Lunlil Coding Lessons — Student Data Privacy Summary

Oct 23, 2026 · @Magdalena

Overview

Lunlil's 7 coding lessons collect no student personal information. Students open a link in a web browser and build a small JavaScript game step by step, with a live preview and quick-check questions. No account, login, or sign-up is involved.

The lessons are Build a Spaceship, Flappy Bird, Whack-a-Mole, Magic 8-Ball, Memory Match, Snake, and Pong. They are aligned to the California Computer Science Standards for grades 6–8 and 9–12, and hosted at app.lunlil.com by Lunlil LLC.

What students do not need

- No Lunlil account, username, or password
- No email address, name, or school ID
- No app download; the lessons run in any modern browser
- No connection to the Lunlil social app, feed, or messaging

What data is collected

Lunlil does not collect or store any data from students using the lessons. Quick-check answers stay on the student's screen and are not sent to Lunlil. Lunlil runs no analytics, ads, or tracking on the lesson pages.

Two outside services are involved, as with most websites:

Service	What it does	What it receives
Netlify (web hosting)	Delivers the lesson pages	Standard server logs, such as IP address and browser type; not used by Lunlil
Google Fonts	Loads the lesson typefaces	The browser's font request, including IP address

To remember which steps a student has unlocked, each lesson saves a simple list of passed steps in the browser's local storage. It holds no name or answers, stays on that device only, is never sent to Lunlil, and clears when browser data is cleared.

What is never collected

- Names, emails, birthdates, or student IDs
- Grades, scores, or quick-check answers
- Photos, audio, video, or location
- Cookies for tracking or advertising

Because nothing is collected, there is no student data to sell, share, or delete.

Teacher access

Teachers reach all 7 lessons from one page, app.lunlil.com/teachers.html. It lists a student link and a teacher link for each lesson, plus the Teacher Guide and the CA standards alignment. Teachers also need no account. The page is hidden from search engines and shared by link only.

Privacy laws and agreements

The lessons are designed so that no student records or personal information are created, which keeps them within the intent of these laws:

- **FERPA** (federal): no education records are created or accessed
- **COPPA** (federal): no personal information is collected from children under 13
- **SOPIPA** (California): no student data is used for ads, profiling, or sale
- **AB 1584** (California Education Code 49073.1): no pupil records are stored by Lunlil

Lunlil LLC is a registered vendor with San Diego Unified and is ready to sign the district's student data privacy agreement, including the California Student Data Privacy Agreement if requested.
